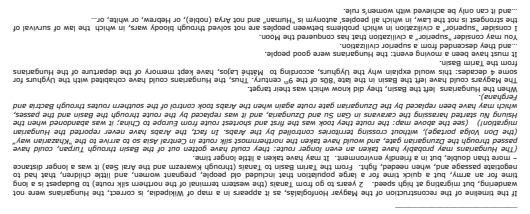
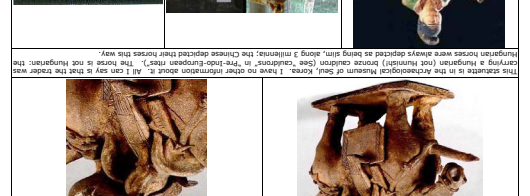
THE PHENOTYPES AND THE ARCHAEOLOGY OF THE SILK ROAD TRADERS



Look at these images. do you really need genetic research to understand that the Hungarians are descendents of the Tarim Basin people, or better, of the Afi? These children could be your children.

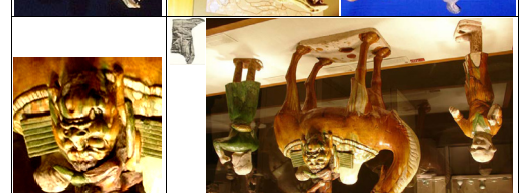


FENOTYPES IN *ARSIA*

HUNGARIAN TRADERS IN CHINA

The following have been collected from a Google search, using only the first 15 pages. Keywords: 'Chinese camel' and 'Chinese horse'. No subtleties are archaeological finds coming mostly from graves, dated to the time of the Han (206 B.C.-220 A.D.) and Tang dynasties (618-907 A.D.). In China, the secretaries of Silk route traders were left to rot in graves in the hope that the deceased could continue enjoying luxury goods in the afterlife.

It appears that Chinese traders used Hungarian guides. In fact, at least 2 of the guys below are Hungarians, the others were probably their servants or slaves. some 70% of the Silk Road traders in China were Hungarians, who were known in China as 'Tocharians'. Tocharians? Or, in the best case, 'Torogarra'. Actually those Tocharis', (who dwelled in the Western territories Protectorate' modern Xin Jiang - the Hungarians were also known as Tocharians) were Chinese. Then Chinese traders and refined by the Chinese Museums that store these statuettes. Tocharians? Or, in the best case, Torogarra'. Actually those Tocharis', (who dwelled in the Western territories Protectorate' modern Xin Jiang - the Hungarians were also known as Tocharians) were Bottles like the below ones are still popular in Hungary for the Unicorn and in Tituna by Chianti wine.



Underside!. The design of the most popular Hungarian bottle in the world is little changed in the last 2.5 Millennia!. It has only lost the foot. (which remained one of the ancient curiosities). They certainly did need a foot for the bottle while travelling along the Silk Road, nowadays the pub desks where the Unicorn is served are flat and stable.
The original design of the bottle had a foot (a 6 millennia old Hungarian Sacred symbol) as a trade mark. Later on that facet became a circle and still is a circle containing a cross (another Hungarian bronze age design) at Zwack's.
heart appliques, Tilla Tepe

How to recognize the Hungarians: Caucasoid phenotype (Mediterranoid), deep set eyes, long nose, sloping forehead, red hair... what Tim Sui Gu defined 'macabre appearance'!). Tattoos (long jacket, trousers, boots, long hair, beard); peculiar objects or religious symbols: conical headdress and... a bottle of Unicum at hand!
The first mention of the Hungarians appear in the Tarim region and, when they never ride, they walk!
Professor of Chinese language, speaks the local dialect with the locals and travelled with them in the most ancient times were Turko-Europeans!.
Tocharians!. Tocharians!. Tocharians!.
