THE UGARITIC ABJAD...

VUARK: the 16-letter alphabet derived from the Vinča signs and was associated to a Finno-Ugric phonology. It existed in Europe before the Indo-Europeans had learnt how to write:

The Celts added to the *VUARK* the letters needed to represent their extended phonology. **PANNONICO* ALPHABET, 14th century B.C:

In the 14th century B.C., the Ugaritics copied the **Pannonico* alphabet, using their cuneiform writing system and a key. **UGARIT CLAY TABLET** (National Museum, Damascus, Syria):

If the Ugaritic cuneiform alphabet is transliterated back into linear, using the reverse key used by the Ugaritic copier, the result is: **TRANSLITERATED UGARITIC ABJAD**:

The Phoenicians did transliterate the cuneiform abjad back into linear, took only the letters needed for their phonology, and made up their **PHOENICIAN ABJAD**. Only *alef*, *yod* and *nun* were local:
