www.michelangelonaddeo.com **CONDENSED SIMPLIFIED ABSTRACT TO MEET** THE LIMITED UNDERSTANDING OF ARCHAEOLOGY OF THE LINGUISTS OF THE H.A.S.

Stone Age Magyars arrived in Hungary from Yugra and next day they started smelting bronze and iron!

The appearance of the Indo-Europeans and of the Magyars in Europe are linked by the same lie. The barbaric, pastoralist, Celts, who had left no trace of having ever smelted bronze, arrived in Hallstatt, and next day they invented iron. Similarly, the barbaric, hunter-gatherers, The lie is the same in both cases; but also the truth is the same. In fact, the Celts subdued the Pannonici, who, after millennia of metallurgy, were ready to replace bronze with iron. The Magyars also had learnt metallurgy from the Pannonici... but, the Pannonici were their ancestors! If you still believe in the Indo-Germanist fairy tale that assumes that Halstatt, La Tene, Troy, Mycenae, Hattusha, and the Nordic Bronze Age could feel as bad as a child feels when somebody tells him that Santa Klaus doesn't exist... it is only a fairy tale! **PANNONIA** HONFOGLALÁS, **PAZYRYKIA ARSIA**

One line of images, or 5 glossæ, are usually enough for the Indo-Germanists in order to allow them to label as "Indo-European" a culture that shares a cultural marker with another culture, which is "assumed" to be Indo-European. Instead, you could be unsatisfied with the
